

Windows 7 – God Mode

For anyone using Windows 7, there is a great way to access the advanced settings from one place. This is widely referred to as "God Mode"

1. Create a new folder. - This can be anywhere, but the desktop is convenient.
2. Rename the Folder to:
GodMode.{ED7BA470-8E54-465E-825C-99712043E01C}
(NOTE: you can change the name "GodMode, but the rest must stay as shown)
3. The Folder icon will change to appear as a stylised monitor with icons
Double click on it to show the God Mode window.

The information contained upon this page is supplied in good faith, and to the best of my knowledge is accurate.

However, I accept no responsibility for damage or injury, however caused, due to the use of this data.
A Google search of the internet will reveal a wealth of further information about this feature.
